Now Available!

Speci-Gard® Specimen Transport Bags

UP95-600BIO • UP95-600BPM • UP95-BDES

- Press and Close™ liquid-tight, secure sample closure
- Traditional inverted opening
- Printed with biohazard logo and instructions for use
- Separate document pocket with flap, ideal for multiple or larger specimens
- Use for a single vial, cup and syringe inoculants

UP95-610BIO

- Press and Close™ liquid-tight, secure sample closure
- Traditional inverted opening
- Printed with biohazard logo and instructions for use
- Separate document pocket with flap, ideal for multiple or larger specimens

The UP95-BDES offers an additional pre-flashed cap absorbent, tested to absorb up to 60 ml of liquid. The bag offers excellent infection prevention and use safety capabilities, secure seal and separate document pocket. Note the perforated opening on the UP95-600BPM is not guaranteed to be liquid-tight, per the performance level of every side.

UP95-118BIOA	White Translucent biohazard	250/Cs	12.5x6.5x2.5	3

The new **ENHANCED SPECI-GARD®** specimen transport product line was designed from feedback and suggestions gathered at numerous laboratory industry trade shows over the past couple of years. **You spoke, we listened, and here is your bag!**

The **ENHANCED Speci-Gard®** specimen transport bags offer significant value:

- All bags are **6x10** with Double Pockets (2 Wall)
- Separate document pocket with flap
- Press and Close™ secure sample closure provides infection prevention and user safety
- Clear view inspection area and sealed specimen for on-flight
- Easy-to-open tear line**
- Wide color coding selection** - Clear or solid body transparent color match bags with biohazard logos
- Simple instructions for use printed on bags
- *These products come in cases of 1000 (100 packs of 100) or cases of 250 (in a dispenser style box)
