

Multipurpose Nitrile Gloves

Nitrile gloves are made from a synthetic polymer material and are an alternative for individuals who are allergic to natural rubber latex. Nitrile gloves provide a strong barrier of protection from water, solvents, and chemicals with a very low rate of leakage. They are also durable and won't easily tear or fail due to having been punctured when in use. The powdered gloves are made with a cornstarch ingredient and conform to FDA requirements for food contact. Gloves are flat-packed in a dispenser box and may be used for general applications.
